

The Right Connection™

Peak Performance Guaranteed

'THE RIGHT CONNECTION FOR CREATING POWER'

Dixon, based in the North West of England, is part of the Dixon Valve & Coupling Company (USA), the world's leading manufacturer and supplier of hose and coupling products for use across a wide range of industries and applications.

Reliable hose and coupling products that give measurable performance.

All hose assemblies are made to order and are manufactured in accordance with ISO and the pressure equipment directive (PED).

Proven product reliability in high pressure applications. Over 100 years technical experience in specifying the most effective solution for every application.

Our on-site engineering, manufacturing and testing facility ensures that we send out the right product to the highest possible standard.

Bespoke and innovative design of products that can reduce production downtime and increase plant efficiency.

Our reputation for expertise, in-depth product knowledge, technical support and unrivalled commitment to quality brings our customers back again and again.
